25 years ago computers were shared. Eg as a post-doc at Univ Nottingham the lab (20 people) shared a 1 Mac

Now everyone (most people??) has one in their pocket, office/lab, home!

**Work intensification **

I used to go into work on Saturdays to finish things. Now work comes with me - everywhere! We're always on.

Everyone has email

When I started, I had an email account on the mainframe

I needed sign off from 3 people.
