ACODE 87 - Academic Integrity considerations in TEL assessment and examinations - 17-18th November 2022. University of Auckland / University of Melbourne joint hosts.

A lot has transpired since the ACODE 81 workshop (e-Assessment: practices, challenges, opportunities) and new challenges have emerged around examinations particularly as it relates to assessment security, academic integrity and eProctoring. At the same time, the risks linked to the latest generation of artificial intelligence tools are quickly becoming real threats to our well-established approaches to examinations. Come join us to discuss current practices in examinations, academic integrity as well as explore ideas to address the upheaval from new technologies.

November 17th Time (AEST)	Topic	Presenter/Facilitator
