

Adelaide University learning ecosystem

Lessons from creating a
new university

Travis Cox

First new major Australian university in a generation, transforming education, research and innovation with impact.

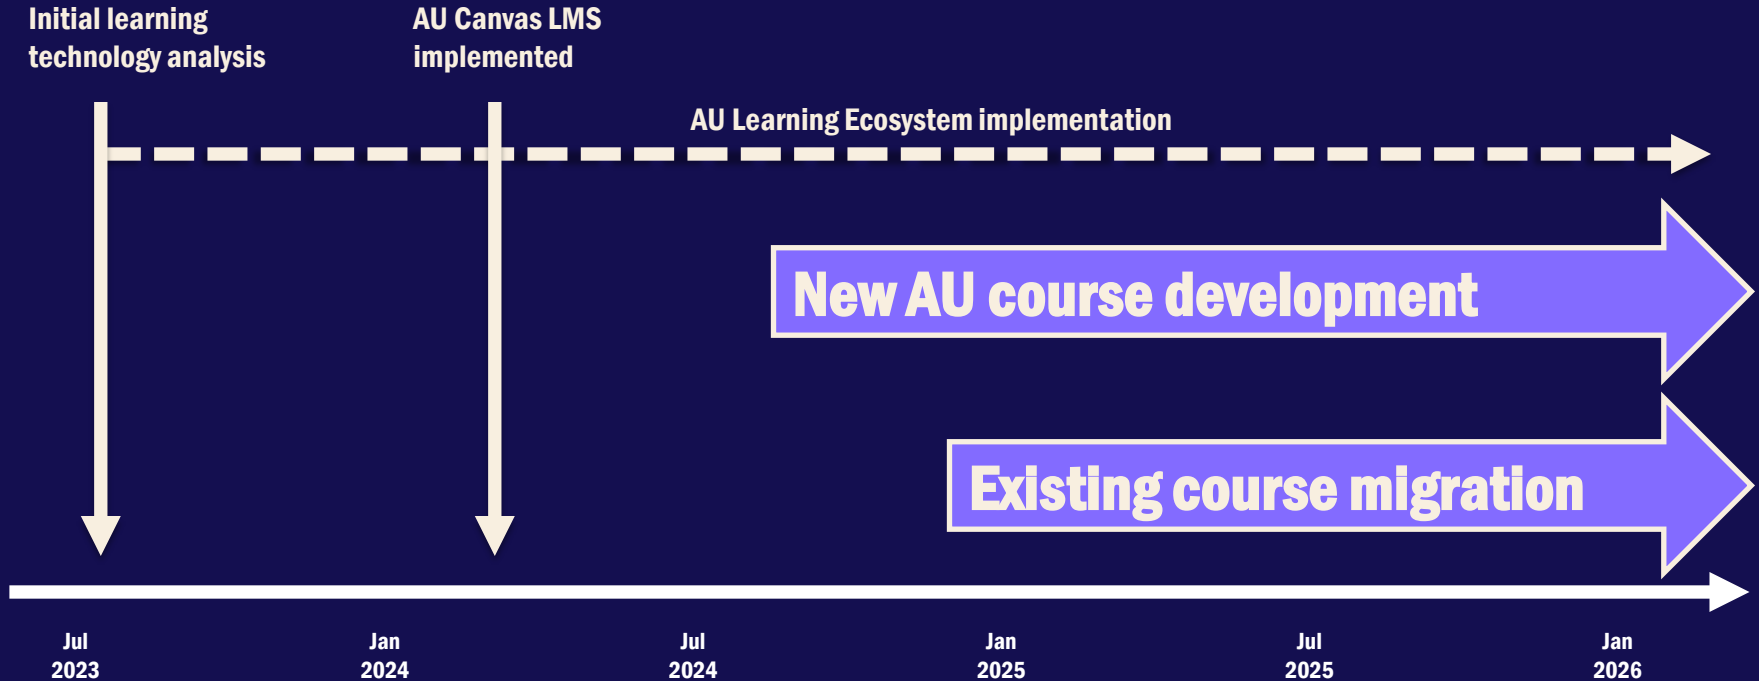

Contemporary and comprehensive, Adelaide University is breaking ground.

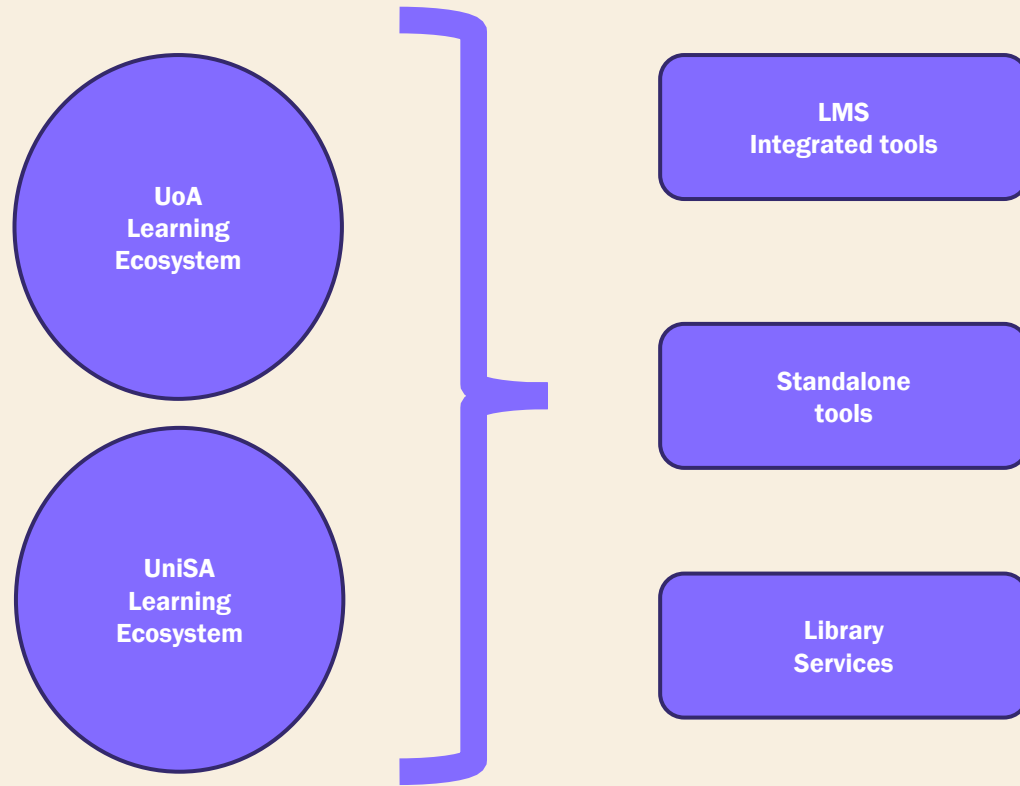

Transforming teaching and learning

**Our vision: To deliver
Australia's most
contemporary, accessible and
future-focused curriculum.**

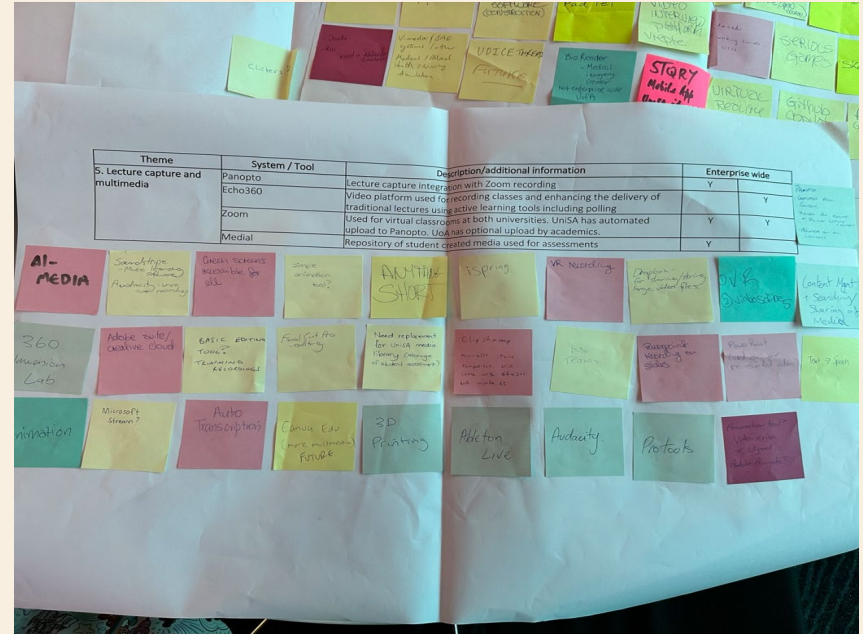

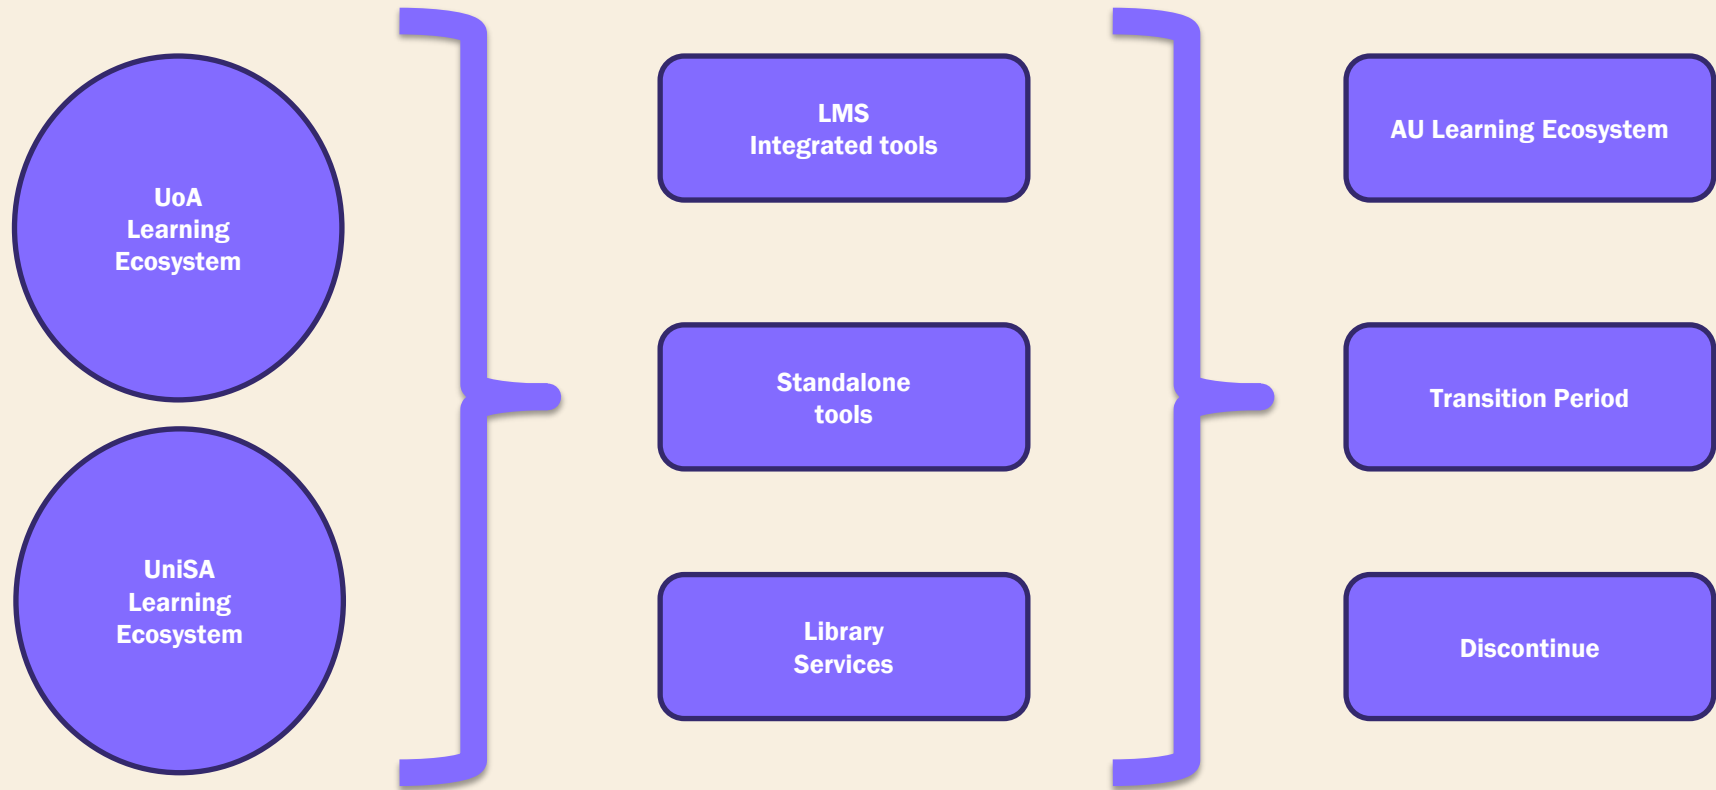

AU learning ecosystem timeline

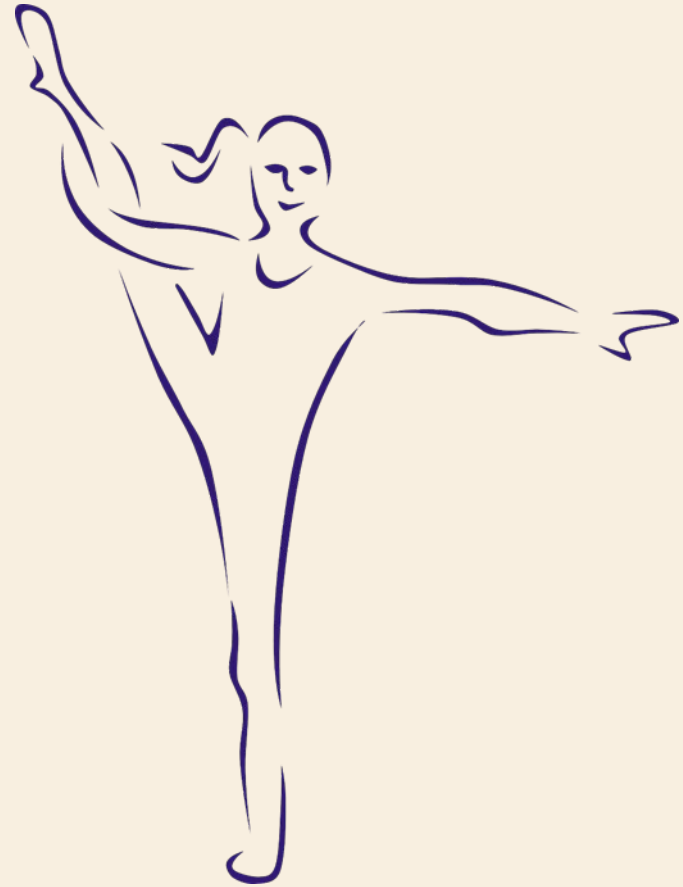

Collaboration

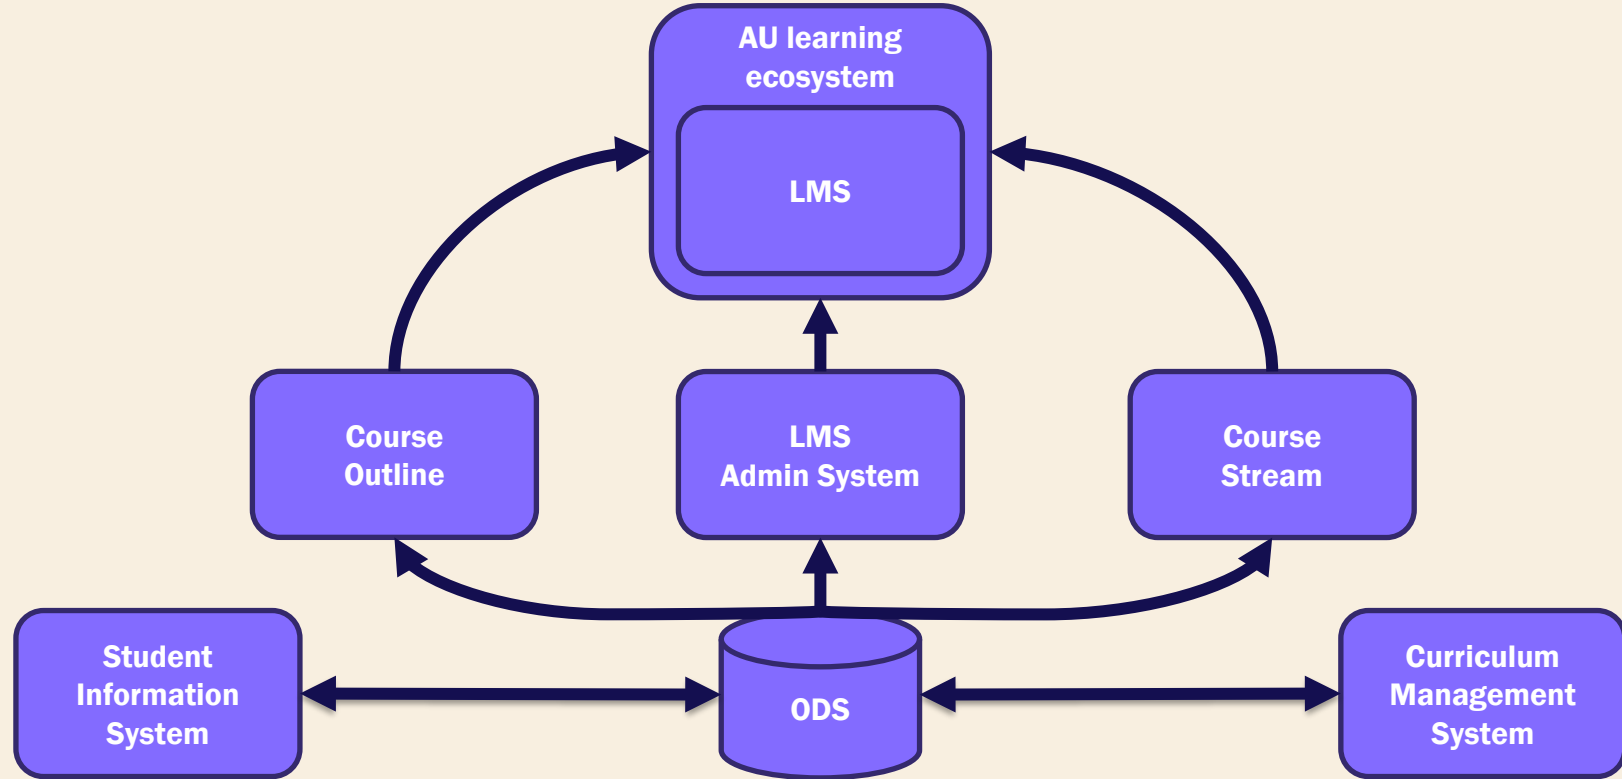

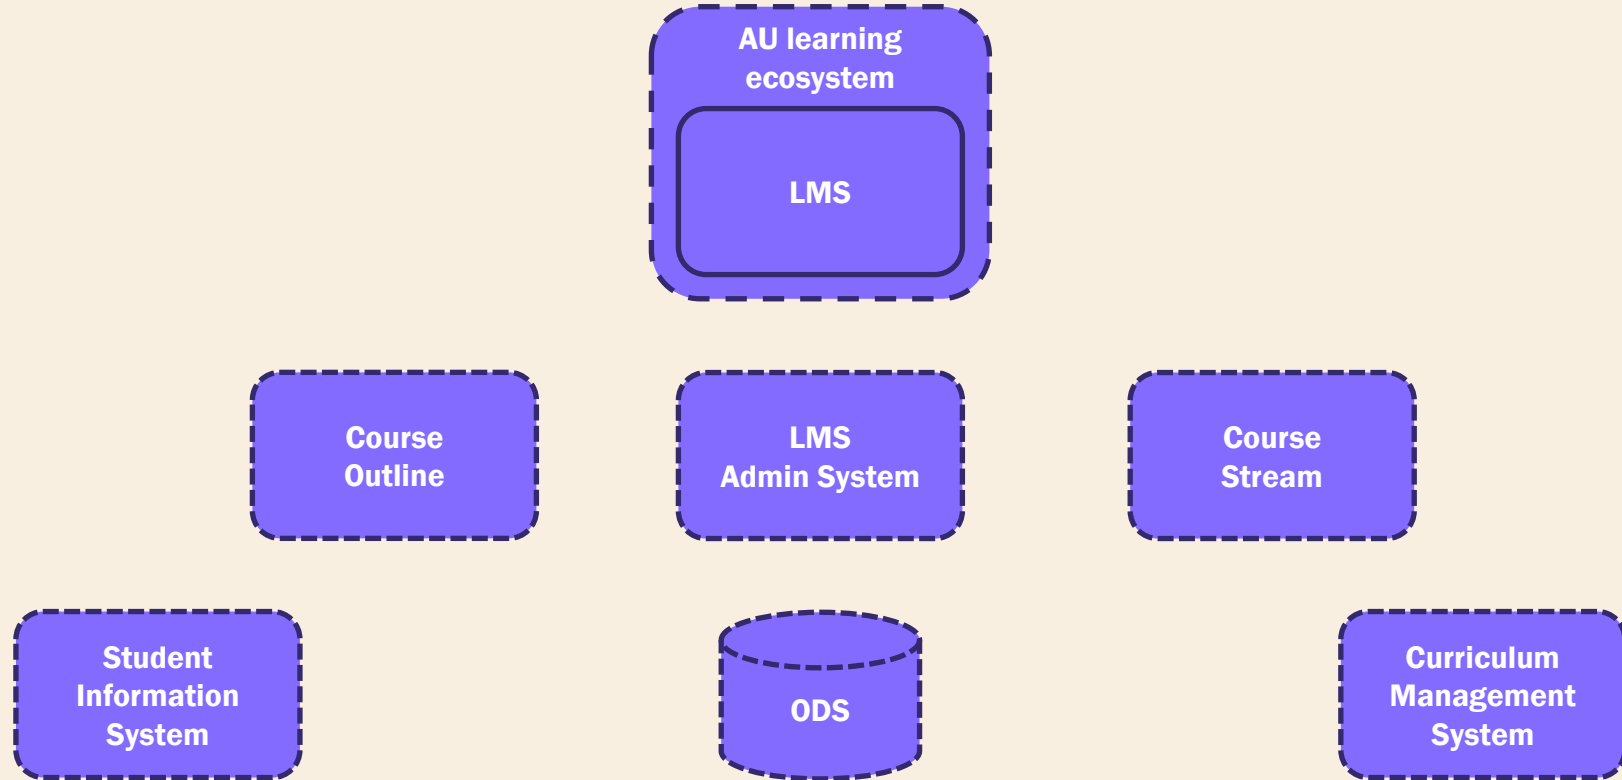

Flexibility of System Configuration & Development

Integrated Ecosystem

Integrated Ecosystem

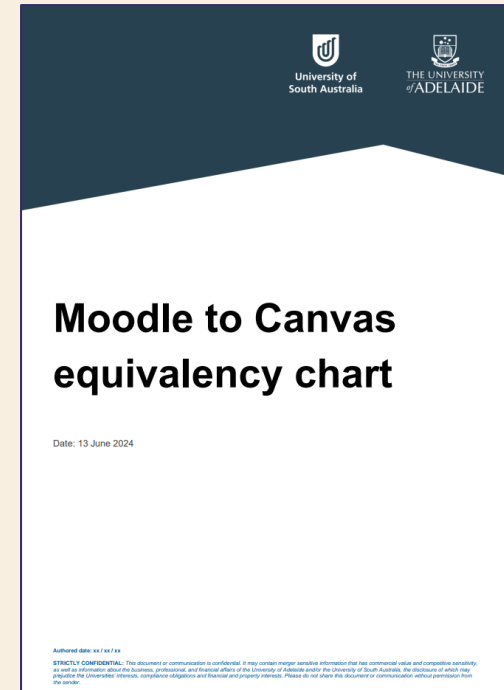

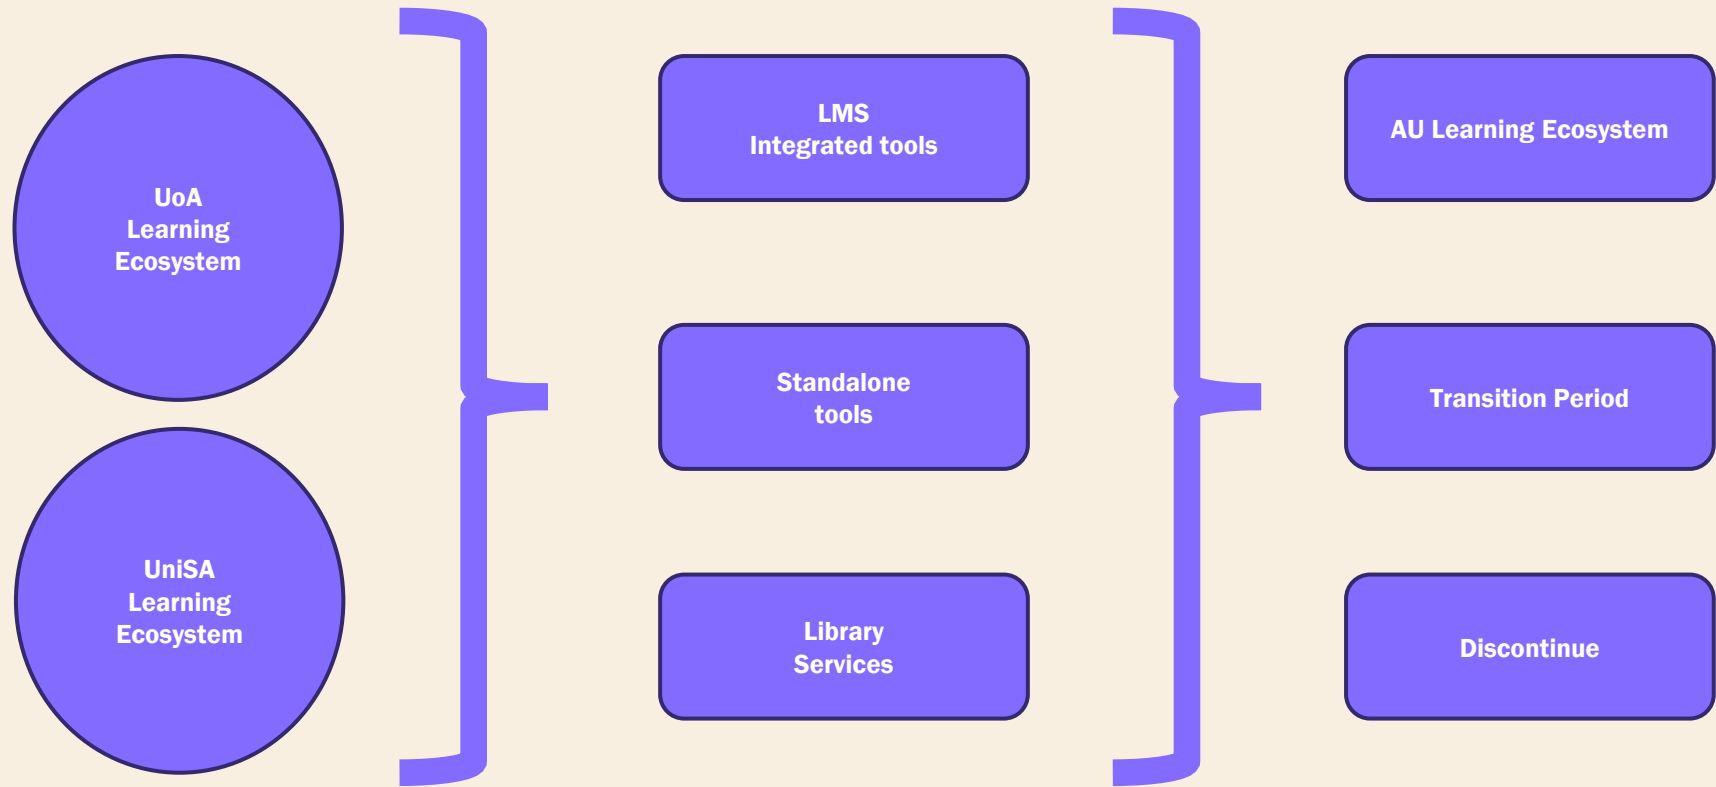

Learning ecosystem – Principles for decision making

Principles

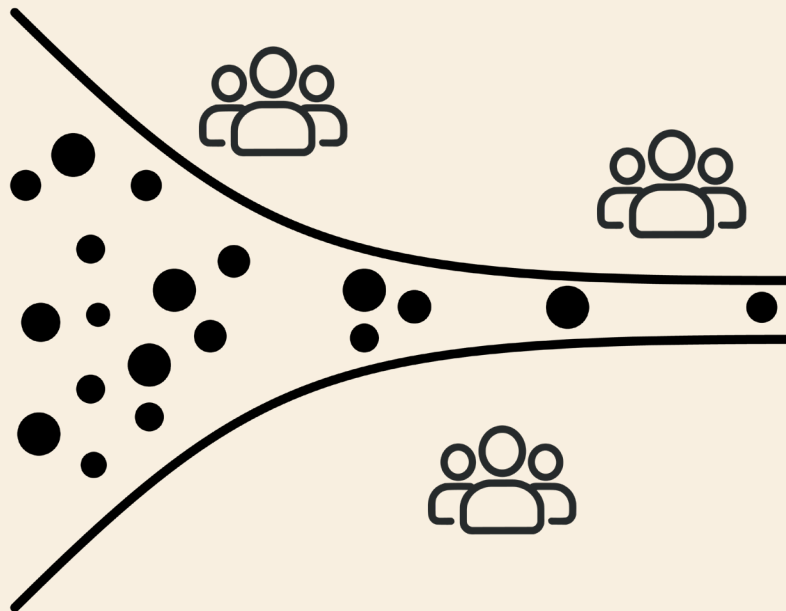

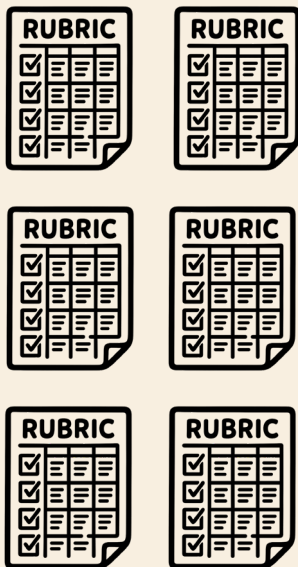

Tools that meet these principles are then also required to adhere to the Architecture Principles and pass through the required Cyber Security, Privacy, Vendor Assurance, and Legal processes of Adelaide University.

- **Prioritisation of Existing Technologies**
- **Preference for Software as a Service (SaaS)**
- **Simplicity and Ease of Adoption**
- **Non-Regression in Functionality**
- **Learning Data Utilisation**
- **Innovation and Continuous Advancement**
- **User-Centric Design and Accessibility**

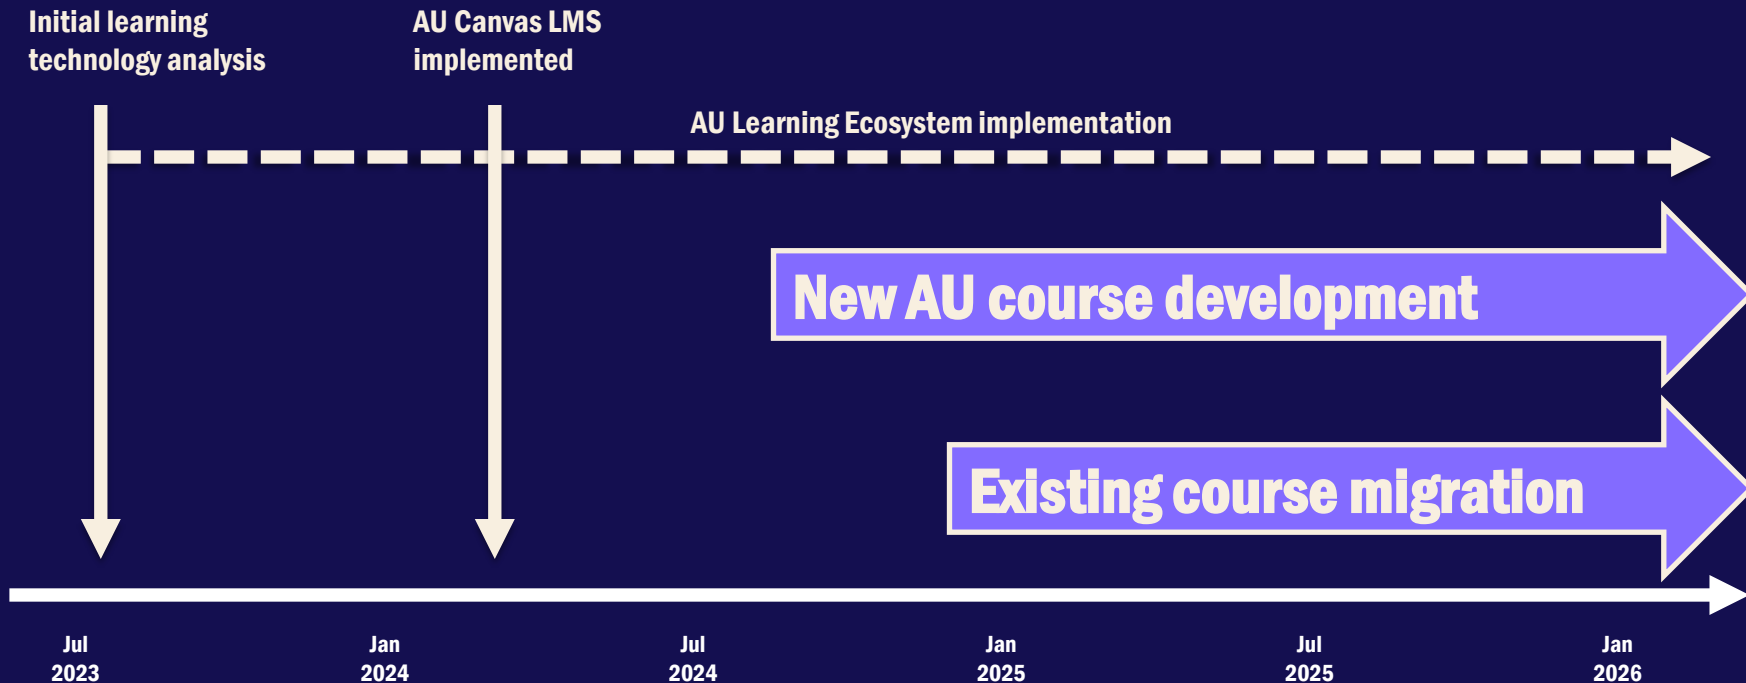

Tool evaluation and validation

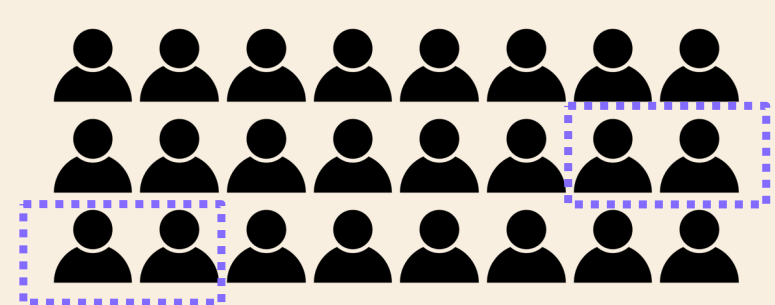

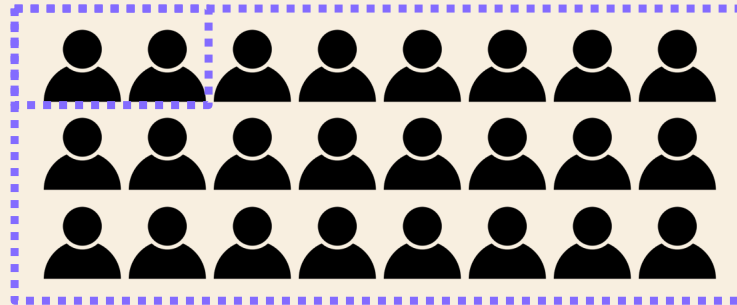

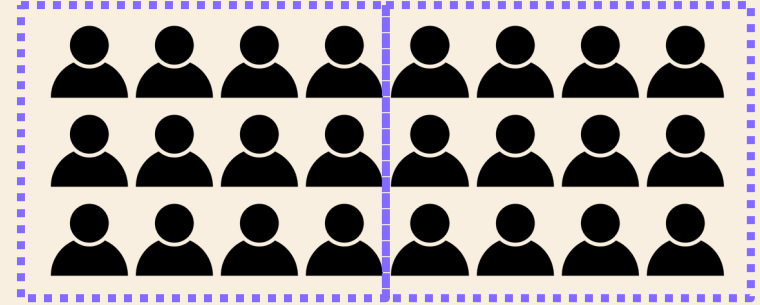

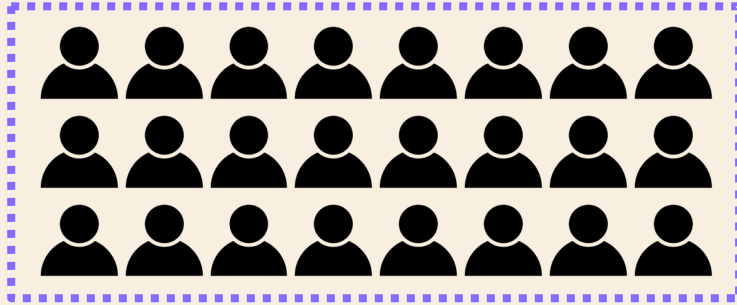

AU learning ecosystem timeline

We identified trusted partners to take the journey with us

Change management – focus on impact

Lessons Learned

- **T&L teams know your current ecosystem**
- **Collaborative culture with shared purpose**
- **Connect change management with impact**
- **Deliver experiences for Day 1 that can be built on in transformation**

Thank you!
